

Stakeholder Type	Clarification Question	Response	Responsible Stakeholder	Type
Insurance Company	What are the exact criteria for approving/rejecting a policy application (e.g., age limits, medical conditions, payment verification)?		Underwriting Team / Compliance Officer	Functional
Insurance Company	How should rejected applications be communicated to agents and policy holders (email, letter, portal notification)?		Operations / Customer Communication Team	Functional
Insurance Company	What is the expected turnaround time for policy approval/rejection?		Operations Manager	Functional
Insurance Company	Should the system support partial approvals (e.g., accept some dependents, reject others), or is it strictly all-or-none?		Policy Approval Committee	Functional
Insurance Company	What level of detail should be stored for claim rejection reasons?		Claims Department	Functional
Insurance Company	How should cheque issuance details be tracked in the system (bank info, cheque number, dispatch date)?		Finance Department	Functional
Insurance Company	Are there compliance or regulatory requirements (IRDAI or other) that must be integrated into approval workflows?		Compliance / Legal Team	Functional
Insurance Company	What reporting capabilities are required (e.g., number of claims processed, rejected policies, fraud detection)?		Business Intelligence / Reporting Team	Functional
Insurance Company	Should company staff have role-based access (e.g., claims officer vs. policy officer)?		IT Security / HR	Functional
Insurance Company	How should locked accounts be reactivated—through admin console, customer support, or automated workflow?		IT Security Team	Functional

Stakeholder Type	Clarification Question	Response	Responsible Stakeholder	Type
Policy Holder	What personal details must be displayed (address, contact info, medical history)?		Customer Experience Team	Functional
Policy Holder	Should policy holders be able to download their policy documents and claim history?		Product Management Team	Functional
Policy Holder	How should policy holders be notified of claim status updates (SMS, email, portal)?		Customer Communication Team	Functional
Policy Holder	Should dependents have separate login credentials or only the primary member?		Product Management / Security Team	Functional
Policy Holder	What level of detail should be shown in claim status (e.g., processing stage, pending documents)?		Claims Department	Functional
Policy Holder	Should policy holders be able to request corrections if agent-entered data is wrong?		Customer Support Team	Functional
Policy Holder	Is multilingual support required for the portal (English, Hindi, regional languages)?		Marketing / Customer Experience Team	Non-Functional
Policy Holder	Should policy holders be able to initiate communication with agents via the portal?		Product Management / Agent Relations	Functional
Policy Holder	What security measures are expected for login credentials (password complexity, OTP, biometric)?		IT Security Team	Non-Functional
Policy Holder	Should policy holders have access to premium calculators or policy comparison tools?		Product Management Team	Functional
Insurance Agent	What validations must agents perform before submitting applications (mandatory fields, document checks)?		Agent Operations Team	Functional

Stakeholder Type	Clarification Question	Response	Responsible Stakeholder	Type
Insurance Agent	Should agents be able to edit policy holder details after submission, or only before?		Product Management / Operations	Functional
Insurance Agent	How should agents track the status of submitted policies and claims (dashboard, notifications)?		Agent Relations / IT Team	Functional
Insurance Agent	Should agents be able to upload scanned documents directly into the system?		IT / Operations Team	Functional
Insurance Agent	What communication features are required between agents and policy holders (chat, email, notifications)?		Agent Relations Team	Functional
Insurance Agent	Should agents have access to claim rejection reasons for better customer communication?		Claims Department	Functional
Insurance Agent	Are agents allowed to manage multiple policy holders simultaneously (bulk upload, batch processing)?		Product Management Team	Functional
Insurance Agent	Should agents have role-based access (junior agent vs. senior agent)?		HR / IT Security Team	Functional
Insurance Agent	What training or help features should be integrated into the agent portal (FAQs, tutorials)?		Training / Agent Relations Team	Non-Functional
Insurance Agent	Should agents be able to generate policy quotations before submission?		Product Management Team	Functional
Cross-Cutting (Non-Functional)	What is the expected system performance (response time for policy/claim submission, page load times)?		IT Infrastructure Team	Non-Functional
Cross-Cutting	What scalability requirements exist (number of concurrent users: agents, policy holders, company staff)?		IT Architecture Team	Non-Functional
Cross-Cutting	What availability/uptime SLA is expected for the system?		IT Operations Team	Non-Functional

Stakeholder Type	Clarification Question	Response	Responsible Stakeholder	Type
Cross-Cutting	Should the system support disaster recovery and backup policies?		IT Infrastructure / Compliance	Non-Functional
Cross-Cutting	What browser and device compatibility is required (desktop, mobile, tablets)?		Product Management / IT Team	Non-Functional
Cross-Cutting	What usability standards should be followed (ease of navigation, minimal clicks, accessibility)?		UX / Design Team	Non-Functional
Cross-Cutting	Should the system follow a specific look-and-feel guideline across all portals?		UX / Design Team	Non-Functional
Cross-Cutting	What audit logging and monitoring requirements exist (user activity, failed logins, policy changes)?		IT Security / Compliance	Non-Functional
Cross-Cutting	How should account lockouts and reactivation workflows be handled securely?		IT Security Team	Non-Functional
